Safe Operating Procedures

K17 Kitchen Floor Cleaner

Suitable for use in kitchens and food preparation areas.

Task

Kitchen Floor Cleaning

Chemical

K17 Kitchen Floor Cleaner

Procedure

Floor Mopping for Kitchen Areas

1. Sweep or vacuum floor to remove all loose soils
2. Add H17 to mop bucket via bucket-fill dispenser
3. Strategically place 'Wet Floor' signs around the area to be cleaned.
4. Begin to mop the floor, following mopping system manufacturers instruction to achieve best results.
5. Continually refresh the mopping solution during mopping. Never continually mop the floor with dirty detergent/water solution.
6. Use the heel of the mop or a hand pad to remove stubborn stains.
7. When floor has completely dried, remove the 'Wet Floor' signs.
8. Do not cross-contaminate by using the same mopping solution for bathrooms and general areas.

Precautions

- Strategically place “Wet Floor” signs or “Cleaning in Progress” signs.
- Wear appropriate footwear to prevent slipping.
- Always wash hands before and after handling chemicals.
- Always wear gloves and safety goggles/face shield when handling K17 concentrate.
- Wear a PVC apron if available.
- Use rubber elbow length gloves and apron.
- Always read SDS & labels before using chemical product.
