

# Safe Operating Procedures

## K37 FOOD AREA CLEANER SANITISER HD

Suitable for use in kitchens and food preparation areas.

### Task

Hard Surface Sanitising and Cleaning in Food Environments

### Chemical

K37 Food Area Cleaner Sanitiser HD

### Procedure

1. Dispense K37 into a labelled spray bottle via bottle fill dispenser or dispense through professional in line foam generating equipment.
2. Always use clean, designated cloth and sponges when cleaning.
3. Apply the K37 solution directly onto the surface or equipment. Wipe or scrub the surface using a circular motion using a medium stuff brush or non-scratch pad.
4. Allow a minimum of 10 minutes dwell time. Re-agitate areas of severe and/or stubborn soiling. The use of a non-scratch scouring pad will be more effective of stains and baked on soiling than a brush.
5. Rinse the surface with fresh water and allow to air dry. Smooth surfaces can be dried with a cloth if desired.

### Spray & Wipe for General Cleaning

1. Fill K37 spray bottle via bottle-fill dispenser and fit spray trigger
2. Always use clean, designated cloths and sponges when cleaning.
3. Remove any loose food scraps or soil by dry wiping them into a suitable receptacle.
4. When cleaning equipment, bench tops, table tops etc. lightly spray the K37 chemical solution on to the surface or cloth.
5. Using a circular motion, wipe area (scrub if soil is stubborn) with a cloth or sponge.
6. Rinse out sponges and cloths and store in a suitable area for them to dry. Throw out disposable wipes & launder cloths.
7. When not in use, always store spray bottles in a safe location eg. locked room or locked cleaners trolley

### Precautions

- Wear safety goggles/face shield if there is a risk of eye contact. Wear a PVC apron if available.
- Maintain adequate ventilation when using.
- Wear gloves when using.
- Always read SDS & labels before using chemical product.

### Hazards (for diluted in-use product)

- Will cause irritation to mouth, throat and stomach with effects including mucous build-up, irritation to the tongue and lips and pains in the stomach, which may lead to nausea, vomiting and diarrhea.
- Will cause irritation to the eyes with effects including: tearing, pain, and temporary blurred vision.
- Will cause irritation to the skin, with effects including; redness, itching and drying/defatting.
- Mists from the product will cause irritation to the nose, throat and respiratory system with effects including; coughing, discomfort, breathing difficulty and shortness of breath.
- Prolonged or repeated skin contact may lead to dermatitis.
